

# CALLING ALL SUPERHEROES!

## Personal, Social & Emotional Development

We will think about our skills and talents and what makes us unique. We will talk about the powers that superheroes have and which power we would like to have. We will think about how we would use this power to help others around us.

## Physical Development

We will continue to develop our fine motor control through funky fingers activities, the use of play dough, scissors and writing materials. We will think about how our superheroes would move.

We will start Forest School for the first 10 children and go to the hall for dancing with the children who attend at the end of the week.

## Communication & language

We will talk about our ideas of superheroes and the powers they have. We will encourage the use of simple questions and answers to develop their ideas and confidence when talking. We will play listening games to talk about our friends' ideas.

## How you can help

As we are going to start introducing some letter sounds to the children, you could ask them which sounds we have been thinking about at school. Which letter sounds are in their names?

Encourage your child to talk about the numbers they see around them. How can we make these numbers? Are they big or small numbers?

EYFS Nursery Class Spring 1

January-February 2019

## Superheroes

## Expressive Arts and Design

We will paint pictures about our superheroes. We will design masks and costumes.

We will sing songs about our superheroes and pretend to be them in role play.

## Literacy

We will retell stories about superheroes as well as making up our own. We will use our phonic knowledge to make and break codes.

We will begin to think about writing our name, continue to make marks and talk about what we have drawn or written.

## Maths

We will continue to develop our knowledge of numbers to 10 and beyond. We will recite them in order, think about how we make these numbers and recognise numerals in the classroom.

We will use the language of shape and think about the properties of these shapes.

## Understanding of the World

We will think about how our superheroes would work in the world and how they would make things better.

We will use our ICT skills to develop our ideas of superheroes and record our thoughts with the digital cameras. We will use the Bee bots to make maps and routes.

Following on my our topic of ourselves we are going to think about how fantastic we are and celebrating the skills we have!
